

Exercise

Scenario: A company needs a database to manage employees, departments, and projects.

- **Departments:** Several exist, each with a unique ID, name, location, and a manager (an employee).
- **Employees:** Have a name, ID, address, salary, and birthdate. Each works in one department.
- **Projects:** Controlled by departments. A project has a name, ID, and budget.
- **Assignments:** An employee can work on multiple projects; the hours worked are tracked.
- **Dependents:** Each employee has dependents (name, birthdate, relationship).
